### SESSION TRACKS

The conference sessions are slotted into tracks so you'll know which session topics are appropriate for you. Here's how we've defined each track:

#### BLS/ALS CLINICAL

These sessions are applicable for EMT-B as well as EMT-I and EMT-P, although the material will be more of a refresher for the latter two provider levels.

#### ALS CLINICAL

These sessions are intended for EMT-P providers only; the material presented will be at an advanced practitioner level.

#### EMS LEADERSHIP

For managers, supervisors and EMS executives, these sessions present the latest topics on government regulations, strategy and practical tools for EMS agencies to be successful.

#### EDUCATION

Educators, whether full-time or part-time, will find these sessions of interest as the track presents topics related to instructional design, presentation skills and student interaction. This year, we are presenting a number of sessions that deal with – or use – simulation.

#### SPECIAL FOCUS

These are topics of interest to all EMS professionals, regardless of their position or employment.

The Internet and social media have allowed us to instantly share ideas and information with others from all over the world. Johnny and Roy would be envious. Or would they? Have computers, smart phones and all our cutting-edge gadgets caused us to overlook the fact there's a living, breathing human being in front of us - someone who needs eye contact, a reassuring voice, or a trembling hand held? That's what made Johnny and Roy, and the professionals they portrayed, so special to millions around the globe. No, Johnny and Roy didn't have all the high-tech, 21st century hardware we have today, but they had compassion for their patients, and passion for their calling. Randy's presentation will remind us that it's not so much about the "business" as it is about people. Don't miss his inspiring keynote address that will lead us back to the heart of why we do what we do.</p> <p><i>Randolph Mantooth* starred as firefighter/paramedic Johnny Gage in the iconic television series Emergency! which debuted 40 years ago. This show was the first to portray paramedics in America and significantly advanced the adoption and implementation of advanced life support throughout the world.</i></p> <p><i>For more information on Randy and his schedule of appearances, please visit <a href="http://www.RandolphMantooth.com">www.RandolphMantooth.com</a>, and follow him on Facebook at <a href="http://www.Facebook.com/RandolphMantooth">www.Facebook.com/RandolphMantooth</a>.</i></p> <p><i>*(Celebrity appearance subject to change.)</i></p>
